

All of DynEd's courses include a series of Mastery Tests to help teachers evaluate a learner's progress and to confirm correct placement into the courses. These tests confirm that students have successfully acquired the unit material under study, thus enabling teachers to correctly manage students' progress along their path to the next certification goal.

Students must attain 85% to pass the mastery tests. If they do not pass, the test will be locked for a pre-defined period of time. The students will have another chance when the test unlocks itself.
